Kyiv School of Energy Policy

Energy Education & KSEP

Reforms in the energy sector of Ukraine and other Eastern Partnership countries have potential to become a **key for rapid development and better governance**. Yet, although countries associated with the EU have generally adopted the primary energy liberalization laws, real implementation is lagging.

Extensive experience of DiXi Group, the Ukraine's leading think tank in energy, suggests that low paced changes are due to **acute deficiency of key personnel** prepared and competent to kick-start the new competitive markets and deliver high quality regulation in line with the EU energy law and policy.

DiXi Group's project educational platform Kyiv School of Energy Policy is tackling this barrier through systematic training of the public regulatory side and private market participants.

As at 2021, KSEP is:

500+ energy experts teamed up within a professional network;

20+ unique training curricula developed and implemented;

2 years of operation on the educational market and 13 years in performing the international development projects (via DiXi Group).

- We build on our experience and close ties with our **EU-based partners and counterparts**.
- Our unique capacity is to bridge the best practices of energy policy and regulation with the local needs and conditions of the Eastern Europe through **relevant experience of Ukraine's energy sector transformation**.
- To date, we have provided high quality training in the EU energy law and policy to over **100 Ukraine's public officials** of various levels alone.

Reliable partner

KSEP is a project platform of DiXi Group think tank created and developed as part of a USD multimillion 3-years USAID Energy Sector Transparency project.

KSEP's founder DiXi Group is also trusted by donors such as the International Renaissance Foundation (IRF), World Bank and the European Commission.

After launch in February 2020, KSEP alone has successfully applied for, implemented and reported under engagements financed by

- the European Commission;
- the British Embassy Kyiv; and
- the Federal Ministry for Economic Affairs and Energy of Germany.

Potential for Sustained Cooperation

KSEP's current and growing capacity allows it to become a **viable instrument of improving the quality of governance** and thus accelerate real improvements in the energy market s.

The team of KSEP is open for negotiation, co-designing and implementing both prolonged and *ad hoc* projects aimed at systematic **fostering the critical mass of competent energy professionals** who will staff the markets of Ukraine and the region.

Please find a short list of illustrative projects implemented or under development by the Kyiv School of Energy Policy below.

Educational Products

Further are described the principal programs, courses and trainings developed and launched by the Kyiv School of Energy Policy.

Nearly all of them required some measure of grant or scholarship financing and thus have been supported by various donors.

STRATEGIC TRANSFORMATIONS IN ENERGY MARKETS

managerial educational program

A 3 months program delivered by leading Ukrainian energy companies' CEOs, former regulator's staff and academics offering modern markets-centered practical knowledge

Main idea: First and only comprehensive educational program in energy management, economics and policy in Ukraine.

Target audience: Audience may be varying with emphasis on the energy market participants.

Impact: The program improves the skills and knowledge of stakeholders in the sector, attracts new people interested in entering the energy sector, creates a platform for sharing experiences and learning best practices for effective management and operations.

EU ENERGY MARKETS FOR UKRAINIAN POLICY MAKERS

regulatory program

Online webinars series offers core reading, 3 full-day interpreted webinars delivered by renown instructors from Florence School of Regulation and practicing energy professionals, and minor assessed exercises

Main idea: A 2-week course on the basics of EU energy law and regulation for Ukraine's civil servants in the energy sector.

Target audience: Public officers from across Ukrainian energy sector.

Impact: Foreign lecturers explain the basics of the EU energy legislation and policy in the context of the unification of Ukrainian legislation according to EU norms. The group learn fundamentals in the EU energy law and have opportunities for networking.

ENGLISH FOR ENERGY MARKETS (A, B)

professional language training

АНГЛІЙСЬКА
для енергетичних ринків

EN

Unique for Ukraine 2,5 months intensive online program for energy professionals delivered in cooperation with a certified English language school

Main idea: The dedicated series of professional language courses for energy sector stakeholders aimed at mastering the both necessary terminology and knowledge of basics in various energy fields.

Target audience: Professionals in the energy sector and students who want to study specialized English with a focus on energy.

Impact: Creation of a strong community of energy experts and empowering the Ukrainian community to access various sources of information on modern energy and governance that only exist in English and to communicate with the peers from the EU.

CLOSED LECTURE ON GREEN DEAL FOR THE INTERAGENCY GROUP

workshop

What is the European Green Deal*

CLIMATE NEUTRAL 2050

Brussels - 13 October 2019

A one-day workshop on the Green Deal to the Government of Ukraine's Green Deal interagency working group

Main idea: To provide a 4 hours crash overview of the European Green Deal concept for the relevant Ukrainian top policy makers.

Target audience: Interagency Working Group on Reducing the Consequences of Climate Change.

Impact: Understanding of the concept, nuances and implications for Ukraine by approximately 30 Ukrainian executive officials from various offices is improved with interpretation provided and live discussion facilitated.

SECTORAL ACCOUNTABILITY IN ENERGY SECTOR

online course

An online course for civil society activists designed to cover the key topics of making a change in the energy sector towards the liberalization reforms

Main idea: Strengthening the role of civil society organizations and representatives in advocacy of reforms in the energy and climate sectors by increasing their capacity through knowledge and skills sharing.

Target audience: Relevant civil society and energy social activists, other civil society representatives, and stakeholders from EaP countries.

Impact: The Eastern Partnership region stakeholders learn the basics of the energy markets and understand the key points of intervention to facilitate market liberalization process in their countries/legislation according to EU norms. The group learn fundamentals in the EU energy law and have opportunities for networking.

How to collaborate with us

1.

What are the forms of support to KSEP?

Individual competitive seats scholarship. On the set terms and conditions, the donor provides a defined number of individual scholarships within a general group composed by KSEP to the successful applicants to a call developed by KSEP under rules provided by the donor.

Group seats scholarship. On the set terms and conditions, the donor covers the costs of training provided to a group of professionals defined by the donor and composed by KSEP.

Similar dedicated course production. The donor and KSEP replicates an existing product with the alterations corresponding to the donor's priorities in topics and audiences.

2.

How do we see the mechanism of providing us with a grant for scholarships?

Preferable option. The donor hires DiXi Group (NGO or LLC) on the terms of a service contract so we can provide the scholarships seats for successful applicants or defined groups.

Alternative option. Under the terms of a trilateral agreement the donor provides scholarships to, and we charge from, the successful applicants.

How to collaborate with us

3.

How are we going to arrange the selection process? What are the criteria?

Selection process can be designed to include all necessary priorities and rules important for the donor. An example of procedure may be the following:

- Step 1.** Application form (+Motivational letter)
- Step 2.** Interview with the jury (only for candidates from the short-list created after the selection based on the application form)
- Step 3.** Evaluation of applicants to make out the list of winners (50% of the total score depends on the application form and 50% depends on the interview)

4.

How are we going to communicate the donor's support/provide visibility?

- The donor's representative may be a part of the jury during the selection process of scholars.
- We could invite the donor to the opening event of the course to give a motivational speech and welcome all participants.
- We could include the donor as an invited expert or participant to some of the events planned within the educational course to contribute to networking building.
- The donor's logo and information on support are used in all communications regarding the particular course or courses.
- Other forms of acknowledgement and visibility options may be discussed and applied
